

Hello Everyone,

We are super excited to announce that robotc food delivery is finally here!!!

We will be the first company in US to launch robotc food deliveries and this will make us stand out from competitors as well as being the most cool food delivery company and this is why we stand out from competitors.

As a reference, we have 59% more food deliveries than our competitors.

Share of Total Consumer Spend, Top On-Demand Food Platforms, USA - Feb 2019

This is going to be the safest, fastest and the most reliable and exciting way to handle food deliveries and this will be scaling up our core business tremendously.

This is how our robots look like 🤖 🍕

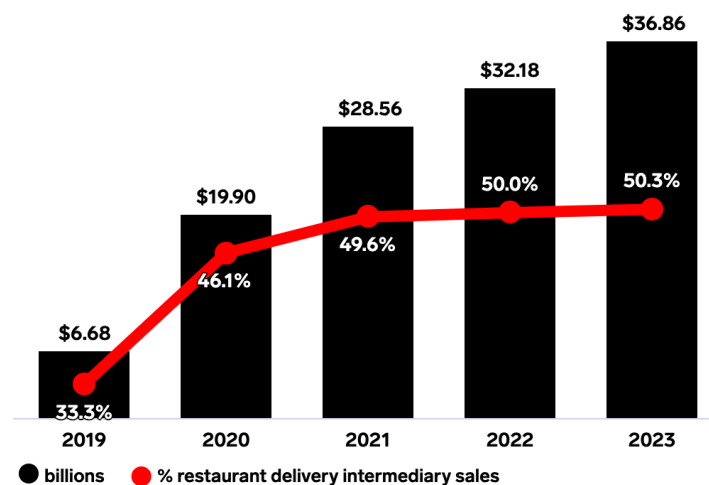

We are super proud of our engineering, marketing, legal teams who have put a lot of efforts to make this happen.

As first step,, we are going to launch robotic food delivery in top 10 cities of US on 20th December 2022. We will collect a lot of data, analyze the video recordings, bot performances and make them reliable over time.

By next year, we will launch in 10 more different cities of US and by 2025 our vision to launch robotic delivery is to decrease the human interaction as much as possible in all 56 states of US.

DoorDash Restaurant Sales
US, 2019-2023

I am very thankful to all the team who have worked late hours, worked over the weekends to achieve our goals within the given timeline. We are having celebration party 🎉 at “Avenue Mansion” and i would love to invite everyone over to celebrate this huge milestone that we have achieved.

Regards,
Mariam Aslam
Head of Product Management
